Full Human Potential Engineering

Enjoying Your Fullest Potential

Rich Aydelott – The Amazing Life Institute & Wellness Center

Have you ever seen or heard of a “Super Achiever?” Someone who does much more than we thought humanly possible... Maybe they are smarter, more gifted, or more talented in some way. We then think to ourselves, they must be special and unique in some way. But are they really?

It is interesting to note, humans are the only beings on the planet who routinely do far less than our full potential and capabilities. For example, will a dog love you or play with you half as much as it can? Will a tree only grow to one quarter of its potential height? In nature, everything is ‘always’ doing the best it can with what it has available. When it has better, it does better!

So here’s the Trillion Dollar Question... Can we learn to awaken Our Fullest Potential?

We are not talking about someone having the genetics of body-builder extraordinaire Arnold Schwarzenegger, or Roger Bannister who broke the four-minute mile. We are talking about the top sales executive who seems to break records without half trying; the student who aces the test without really studying, and those who always seem to have the answers to whatever is going on.

Have you ever heard of Shaman, Medicine Men, Eastern Monks, or Ninjas who have what seem to be mystic powers? In 1994 Ingo Swann, who ran the CIA’s remote viewing group, reported to a United Nations group that we ‘all’ have at least 17 extra sensory perceptions we can learn to use. In his 1996 published report, 31 extra sensory perceptions are listed.

During a conversation with Dr. Victor Vernon Woolf of the International Academy of Natural Science in 2009, he said that upwards of 384 senses have been discovered. To make this even more interesting, the E8 Model in Quantum Superstring theory suggests that we may actually have at least 248 dimensions rather than the 3 or 4 that most of us are aware of!

The point is this, everything that “Exists,” Exists; even if we are not aware of it. Much is happening outside of our current awareness and the capabilities and potential we all have also exist. Whether or not we know it...

Think of it this way, can you use ‘every’ possible function and capability of your cell phone or your computer? For most of us, the answer is an overwhelming NO! However, our cell phones and computers have manuals, and we can get tech support and take classes to learn and master whatever functions we want.

Here’s the challenge..., there is no manual for Human Potential, at least none I am aware of. If there is, I would love to read it! There are 1,000’s of books on enlightenment written over the millennia, however none of them can actually enlighten us. It is only AFTER experiencing an ‘awakening,’ we refer to a passage and realize ‘Oh... that’s what they were saying...’

Amazing Life Wellness

Many say we are made in the image of GOD. What does this really mean? Who can answer this question? The Kahuna's of the islands say, 'it is impossible to comprehend anything higher than ourself.' So how can any of us comprehend or understand what we are not yet aware of?

Throughout history, there have always been people with extraordinary 'gifts' and 'super human' abilities. What if we ALL have these abilities? What if we just haven't figured out how to safely awaken them yet? What happens if 'we' actually do begin opening our fullest potential?

"Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness that most frightens us. ... You are a child of God. Your playing small does not serve the world. ... As we are liberated from our own fear, our presence automatically liberates others." ~ Marianne Williamson

The Greatest Questions yet to be answered are "Who Are We? and Why Are We Here? The reason these questions have plagued us for millennia is, there is no 'one' answer that works for everyone. These are answers we must each find for ourselves. Who can teach us? Must we sit in quiet meditation for decades, or as some believe, lifetimes? What if we have a better way?

Virtually every culture has teachings that we are more than what we experience. Think about this... We all have the same basic equipment. Experts in their respective fields, affect changes in human minds and bodies because they know, we basically all have the 'same stuff' located in the 'same place' functioning in the 'same way.' As we learn and become more aware of our potential, we must build success upon success. Would Arnold Schwarzenegger, have been 'Arnold' if he had never gone to the gym? What if there is a 'Gym' for our Full Potential?

Dr. David Hawkins, in his book Power vs Force wrote, the average person does not raise their consciousness more than 1 to 5 points in their lifetime (based on his Map of Consciousness). In 2010, we set out to test this hypothesis. We put together a workshop entitled 'The Power of Consciousness and the Ripple Effect.' Dr Hawkins asserts, 'your' consciousness affects us all.

In our experiment, we developed programs for raising human consciousness to see if we can in fact, accelerate enlightenment. We taught our students basic 'Kinesiology' or 'Muscle Testing,' and using Robert Fletcher's processes of Thought Pattern Management, we taught their minds how to find the best answers and resources they need to resolve their own internal blocks and negative belief systems that had kept them from experiencing their fuller potential.

Is it possible to accelerate the awakening of our full human potential? The answer is an inspiring Yes! During the original workshop, each of our students raised their awareness by over 40 points on average. Since this time, we have developed even more powerful tools and routinely help our clients achieve their goals of enhanced performance and their ever fuller human potentials.

Remember, only one being in all of the universe is able and powerful enough to stand between you and your success. When you know who this is, you know where to begin...
