

Amazing Life Wellness

The Wellness Frequency

Everything is Frequency and Vibration

Rich Aydelott – The Amazing Life Institute & Wellness Center

What if we can heal the mind and body with something as simple as sound and light? Given the ease with which we can make any form of sound and light, the landscape of our health and wellness would be quite different than it is today.

“In the beginning was the Word.” Words are frequencies and vibration. Everything you hear and much of what you feel is frequency. Light and Colors have specific frequencies and these frequencies affect all aspects of our daily lives. While sounds and colors of light extend well above and below our human ability to sense, they still have a profound ability to affect our mind and body’s health.

You may remember a singer shattering a wine glass with their voice. When the sustained frequency of the voice matches the frequency of the glass, it causes the glass to vibrate and it is this vibration that causes the glass to shatter. This same phenomenon causes bacteria, virus and parasites to cease function.

Back in the late 1800’s and early 1900’s a brilliant man by the name of Nicola Tesla explored frequency and discovered how energy works. Tesla’s desire was to benefit humankind even to providing the world with Free energy. Albert Einstein actually commented that Nicola Tesla was more brilliant than he.

In the 1920s, a man by the name of Dr. Royal Rife invented the first microscope capable of seeing live bacteria and virus. A spectacular feat when you consider all of the most powerful microscopes such as the electron microscope instantly kills the pathogen being observed.

Building upon the frequency work of Tesla, Rife would observe a virus or pathogen while adjusting a frequency generator until he saw the organism begin to vibrate and then explode. He then documented the specific frequency for that organism. He proved that cancer is ‘always’ caused by a virus, which he named the BX virus.

In 1931, 44 of the most respected, powerful and prestigious medical authorities in the country, including the heads of major Hospitals and Medical Universities, attended a banquet honoring Dr. Royal Raymond Rife. The celebration was entitled “The End of All Disease.” Prior to this event, Dr. Rife had successfully created and cured cancer in laboratory animals thousands of times with the full recovery of the animals. Many times the tumor was reported to be larger than the animal itself.

In 1934, Dr. Rife fully cured 16 terminally ill human Cancer patients with no observable side effects in less than 4 months. This accomplishment is even more incredible when you realize he was only allowed to work with patients the medical community had already given up on. How did he do this? Frequency.

This is well documented in record, and was front-page news at the time. Explaining why the medical community does not use this technology is fodder for another future article.

Dr. Otto Warburg, while presenting at a convention of Nobel Laureates in 1966 said, “...*there is no disease whose prime cause is better known, so that today ignorance is no longer an excuse...*” and that *there are many in the medical field who are “inhibiting the application of scientific knowledge in the cancer field. In the meantime, millions of men must die of cancer unnecessarily.”*

This was over 45 years ago and little has changed in the ways of treating serious illness and disease.

Our mind and body responds both negatively and positively to the spoken word, which is again just

Amazing Life Wellness

frequency and vibration. In multiple studies conducted in various countries including the US and Russia, it is now recognized that even our DNA can be healed and reprogrammed with just the human voice.

We have helped people recover from physical and mental ailments just by teaching their mind a more effective method of healing. One of our clients completely recovered from stroke within 4 hours of our session. Another of our clients learned how to ‘talk’ to her mind and body and has incredible healing results even from serious injury. This is effective even if our client is across the world by phone.

Dr. Masaru Emoto wrote a fascinating book entitled ‘the Hidden Messages in Water’ where he labels a container of water and then freezes a drop of that water and observes the resulting crystal. He found when he labeled the water with positive words, such as ‘love,’ beautiful crystals formed, and when the water is labeled with negative words, such as ‘hate,’ misshapen crystals formed. This understanding leads us to question the true energetic effect of the labels we give ourselves, and each other, as we are largely made of water.

Healing Frequencies:

Here is just a few of the benefits realized with frequencies... Different Frequencies can accomplish different outcomes. Not all frequencies are beneficial. Of those that are, some frequencies heal while others energize and others may detoxify. Some frequencies such as 20 cycles per second (Hz) and others are the multi-taskers and do it all. We use several Rife machines in our wellness center.

Note that ‘Hz’ is the unit of cycles or pulses per second. Be sure to consult with someone knowledgeable in using frequency technology and equipment before trying this on yourself or your loved ones.

- 2 Hz heals our Nerves
- 7 Hz heals our Bones
- 10 Hz heals our Ligaments
- 15 Hz normalizes Blood Pressure
- 17 Hz increases Blood Flow
- 20 Hz is very Healing Overall
- 528 Hz heals our DNA
- 635 Hz stimulates Colon Function
- 763 Hz stimulates normal Thyroid Function
- 835 Hz Boosts our Immune System

Note: While these are healing frequencies, they do not substitute for proper nutrition and healthy lifestyle including proper exercise, hydration and rest.

Harmful Frequencies:

Today there are few places we can go where we are not constantly bombarded with these frequencies and electromagnetic radiation. We have 1,000s of Radio frequencies and Electromagnetic frequencies making our Radio, Television and Cell Phones work. Too much exposure to these frequencies can be harmful.

You Are Your Best Investment:

How do we stay healthy and yet use the technology to work and enjoy life. This is a huge trade off in our society. The answer is to continuously educate yourself as to your choices and the resources available. Get to know the people who are already into these fields who have exceptional results and learn from them. Do the best you can until you can do better, and remember to learn from your mistakes. Eleanor Roosevelt said, *‘Learn from the mistakes of others. You can’t live long enough to make them all yourself.’*

All answers are available to those who Ask, Seek and Knock upon the door of Opportunity.
